

Data collection methods and acknowledgements:

- The attendance data was collected through two methods:
 - If a reasonable group photo was available, the non-officers in the photo count towards the attendance.
 - If a reasonable check-in sheet is available, then the non-officers who checked in count towards the attendance.
- These statistics are counted assuming that anyone who attended these hikes signed up and were either present in the group photo or the check-in sheet.
- The expected attendance number comes from the number of non-officer recipients of the Update email each week, or the total number of hikers on the check-in sheet if the sheet is usable.
- Any statistic regarding absence reports only include publicly available Discord messages on the Hiking Club Discord server.
- The data encompasses hikes from Fall Week 1 to Spring Week 9.
